# Hosam Nasr

hos4am@live.com          Riyadh, SA - Khartoum, SD          +249963056666

I have been a web designer, web developer, a software engineer and a founder/CTO and not necessarily in that order.

## been there.

### Senior Software engineer/ team lead @ ZID                     2022-Now
- Contributed to and later led the development of internal products that helped streamline how the team worked.

### Software team lead @ GLT                                      2021-2022
- Led multiple teams through the process of rewriting/ enhancing software products.
- Helped the company expand their software development team.

### Founder/ CTO @ FLEX                                           2019-2021
- Founded a startup that developed Sudan's first mobile app based delivery service tailored for SMEs.
- Designed and built the backend, dashboard web app and consumer and driver mobile apps.
- Made it to the 100/day order milestone.
- Had to shut down due to lack of funding and political instability in sudan.

### Frontend developer @ Homoola                                  2017-2019
- Helped build and maintain homoola's dashboard.
- Build an 'Action center' module. An all-in-one view from which the OPs team can monitor all activities and take appropriate actions.

### Web Dev @ Shoghol                                             2016-2017
- Was exposed to my first fullstack experience here as I built a web app that helped students apply for part-time jobs.
- Worked on developing a mechanism that would automatically filter out top candidates based on job description, location, etc.

### Web Dev @ ISAMA                                               2015-2016
- Built websites using wordpress and other technologies.
- Worked with clients to identify business requirements and design.

# Done that using.

Javascript, Typescript, Angular, Vue, ionic, C#, NodeJS, SQL

# And came back for.

- The Room where it happens. A place where you can write code to make a significant difference.
- A friendly workplace culture in which opinions and contributions are welcome and hierarchy isn't a factor.
- Task-based accountability. I believe performance-not hours-is all that matters.

# Others.

- I hold a Bachelor's degree in Computer Engineering from Future university of Sudan(which I attended from 2009 to 2013).
- Arabic is my native language. I am also fluent in English.
